Review 11 of 11

Price Paid: \$2600.00 from <http://www.lighttav.com>

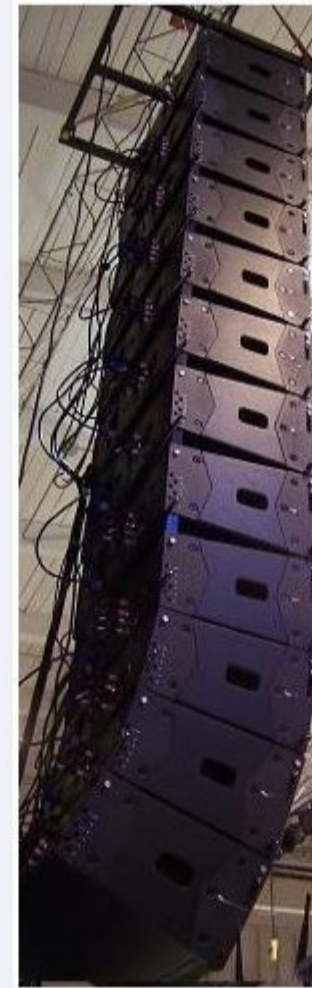

Summary:
 I am new at having a quality system like this one and it is difficult to assess it by component. But, I would recommend it and would appreciate any comments from others. It performs well in music and theater applications.

Strengths:
 Sound output in conjunction with the following components is excellent: Marantz AV-9000, Earthquake Sub MIV, Newform Research Ribbon [Speakers](#), Toshiba DVD-SD2200. The amp can handle more than my house wall and windows.

Weaknesses:
 very heavy and difficult but it is worth the effort
